

Lepas L8 Elegance, All The Way

Lepas
Drive Your Elegance

Elegant All-round Premium SUV

Drive Your Elegance

LEPAS

Inspired by the leopard

Embodies the perfect integration of speed, power, and elegance

Its name evokes the spirit of leaping across regions and cultures

Reflects a global vision of boundless travel experiences

Inspires urban explorers to pursue an elegant and tasteful lifestyle

The LEPAS brand proposition "Drive Your Elegance"

To grace the world with brilliance, one must first master life with elegance

When you choose the LEPAS L8

You gain more than just a versatile vehicle

It is an elegant calling card of the global elite

And you acquire the confidence to command your own life

LEOPARD AESTHETICS

Pioneering Leopard-Inspired Front Fascia

Inspired by the intense expression of a poised leopard, the front fascia features a dot-matrix grille that creates natural layers, precisely capturing the wild yet ordered essence of the leopard. Elegant yet sharp, it defines the brand's pioneering family design.

Leaping Leopard Beltline

Inspired by the agile posture of a leaping leopard, the beltline flows seamlessly from the front to the rear, outlining an elegant arc. Paired with semi-flush door handles, technology and elegance merge perfectly here.

*Body color and technical parameters are laboratory data for reference only. Figures may vary by country. Refer to local market data.

Leopard-Eye LED Headlights

Drawing inspiration from the lively spirit of a leopard's night vision, the headlights take the shape of leopard pupils, with sharp lines creating a visually striking and intense presence - truly eye-catching when illuminated. The adaptive high-beam system ensures elegant and composed night journeys.

Leopard-inspired full-width LED taillights

The horizontally extended light bar integrates seamlessly with symmetrically arranged triangular diamond elements. When illuminated, the taillights evoke the silhouette of a Leopard streaking through the night. The interplay of light and shadow adds exquisite texture to the rear, while visually extending the vehicle's width to create a composed and commanding stance—a true embodiment of elegant design aesthetics.

Custom, Exclusive Innovative Paint

Featuring a seven-layer innovative paint process infused with exclusive highly-oriented aluminum flakes. When sunlight graces the body, the reflected light spreads evenly, increasing the paint's brilliance by 20%, resulting in a dazzling, highlight-filter-like quality. A matte clear coat softens the light, scattering a delicate, satin-like texture - elegance inherent from the start.

LUXURIOUS SPACE

Class-Leading Overall Dimensions

2800mm class-leading wheelbase: The more spacious and comfortable interior accommodates both your family's laughter and joy, as well as your own poise and composure, ensuring comfort and elegance accompany you every mile.

Foldable Rear Tray Table

It can serve as a snack table or viewing table for children, or as your mobile workstation or coffee nook. This versatile tray, easily stowed and deployed, allows every occupant to find their own comfort and enjoyment - a testament to the thoughtful attention to detail.

47 Ingenious Storage Spaces

Every detail is an expression of spatial artistry. Even the most delicate personal items have their designated place. 47 ingenious storage spaces - not merely an exercise in organization, but a gentle response to a life of refinement.

Versatile Spatial Configurations

We transcend conventional spatial boundaries. Multiple seating modes can be switched at will, transforming the cabin from a pleasant driving space into your exclusive mobile living room, making every journey an extension of your life.

Wrap-around Cabin Design

The occupant space is enveloped by elegant and gentle curves. The modern, minimalist center console layout skillfully balances an expansive field of view with a sense of technological sophistication. Take a seat to enjoy tailored comfort and a sense of security, ensuring every journey is undertaken with elegance and composure.

Active Fragrance System

The active fragrance system can operate in conjunction with the AQS and be customized based on the driving scenario. When it detects the driver is approaching a state of fatigue, it will automatically switch to an invigorating fragrance and simultaneously adjust the cabin temperature to help dispel drowsiness and ensure driving safety.

UV-Blocking and Heat-Insulating Glass

The windshield uses double-silver coated glass, which effectively blocks 99% of UV rays and a significant amount of infrared radiation. This protects the skin of you and your family and helps slow down interior aging.

AQS Air Quality Monitoring System

Innovatively employing medical-grade purification standards, it can accurately filter particles as fine as PM0.3. Equipped with a high-precision gas monitoring system, it detects the concentration of irritant gases like CO, NO2, and NO in real-time. Combined with negative ion technology, it effectively creates a fresh cabin atmosphere, alleviating nasal discomfort and sensitivity issues.

LUXURIOUS SPACE

Cloud Comfort Lounge Seats | Designed with ergonomics, the seats feature ten layers of skin-friendly materials for an optimal balance of comfort and sustainability. The front seats come standard with massage, ventilation, and heating functions, with an independent leg rest for the front passenger. The rear seats offer two-stage adjustable angles, ensuring meticulous comfort throughout every journey.

Theater-class Serene Cabin

Silence is a form of elegance. We understand your preference for serenity. With 60 acoustic insulation treatments throughout the vehicle and over 20 NVH optimization measures, we isolate external noise from the source to the cabin. Whether you are traveling alone or with companions, absolute tranquility accompanies every journey.

Intelligent Rapid Climate Control

No more long waits. Our precision-engineered thermal management system enables rapid cabin temperature regulation, achieving a 32°C drop in outlet air temperature for both front and rear rows within 5 minutes, quickly bringing the cabin from scorching heat to a comfortable environment.

ELEGANT DRIVING

Intelligent Interactive Cockpit

The L8 smart cockpit is powered by the 8155 chip, delivering robust computing performance. The 13.2-inch high-definition screen offers a fluid user experience, while the intelligent voice interaction system responds instantly, allowing you to control cabin functions with a single command. Remote control via the mobile app allows for climate pre-conditioning and door unlocking, creating an elegant travel experience through intelligent convenience.

APP Remote Vehicle Control

- Remote vehicle condition query
- Remote vehicle search
- Remotely turn on/off the air conditioner
- Remote control seat heating/ventilation

Intelligent Driving Technology

• **APA/RPA Parking System**
The system automatically searches for available parking spaces, performs steering and speed adjustment operations, and precisely parks into the space, eliminating the troubles of "difficult spot finding" and "parking anxiety". Remote parking allows parking operations to be completed via remote control, making parking more effortless and elegant.

• **540° Panoramic Transparent Imaging**
Utilizing 7 HD cameras, 12 ultrasonic radars, and 1 millimeter-wave radar working in coordination, a 540° vehicle situational awareness system is constructed. Whether navigating narrow roads, uneven surfaces, or low-speed parking, the system clearly displays the surroundings and chassis conditions, eliminating blind spots and consistently ensuring safety and peace of mind.

• Level 2 Assisted Driving

LEX INTELLIGENT NEW ENERGY PLATFORM

LEX: A global intelligent modular platform built by gathering global technical system capabilities, integrating ultra-high bandwidth and multiple energy forms.

① Strong compatibility and expansion, full-size power compatibility

② Built on a new energy platform for better spatial layout

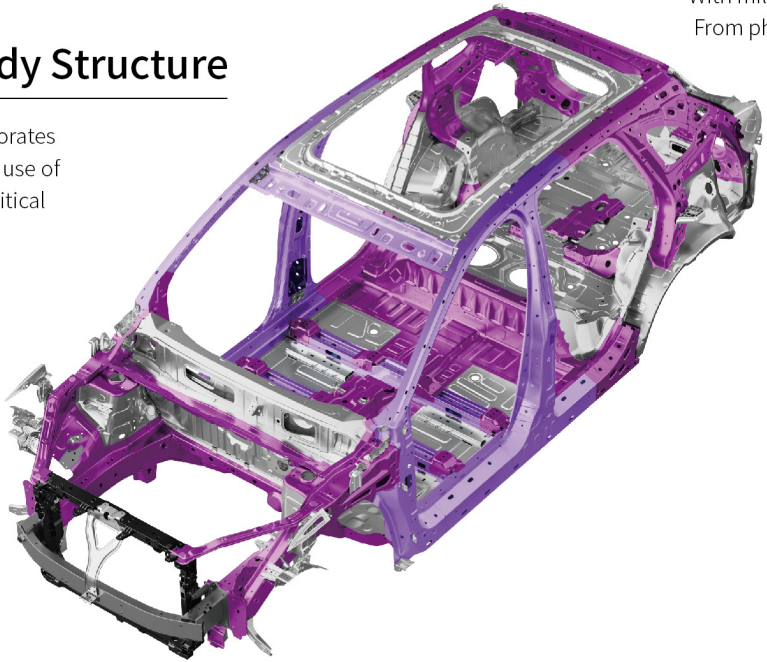

③ Brand-new electronic and electrical architecture, highly intelligent vehicle

MOBILE SECURITY FORTRESS

Cage-Style Safety Body Structure

The cage-style body frame design incorporates 81.1% high-strength steel, with extensive use of ultra-high-strength hot-formed steel in critical areas such as the A-pillars and B-pillars. This significantly enhances the body's resistance to deformation, preserves the integrity of the cabin's survival space, and provides reliable safety protection for all occupants.

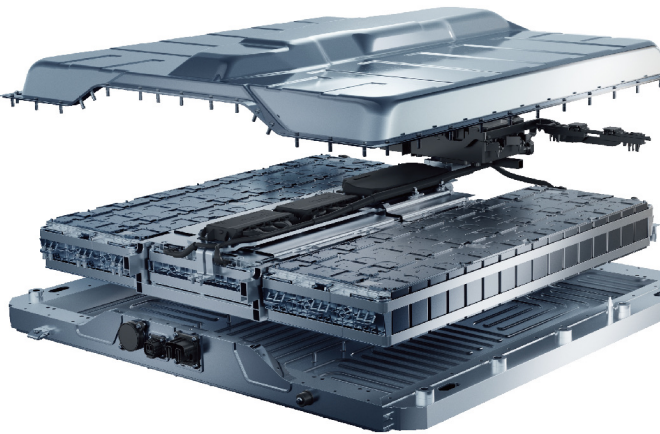

Comprehensive Protection with up to 10 Airbags

Up to 10 airbags equipped throughout the vehicle, including an additional knee airbag for the driver, impact to the legs is cushioned in severe frontal collisions, reducing injury risks. A far-side airbag is installed between the front seats, helping to prevent front occupants from colliding with each other and reducing contact risks with interior components such as the center console armrest. Added protection means added peace of mind.

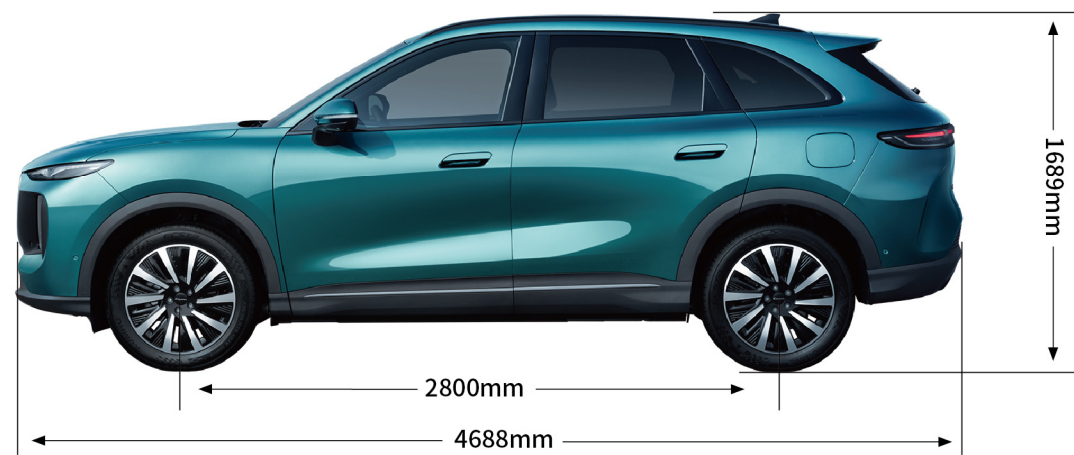

Triple Battery Safety Protection

- **Structural Protection**
The battery pack features a 5-longitudinal, 3-transverse anti-collision design, establishing a robust protective barrier from the source and reinforcing the structural defense for battery safety.
- **Sealing Protection**
Equipped with dual IP68/IPX9K protection ratings, it effectively prevents water and dust ingress, ensuring the battery remains safe and stable even in harsh environments.
- **Intelligent Protection**
With millisecond-level intelligent power cut-off capability, it responds rapidly to potential risks. From physical structural protection to intelligent safety response, the system comprehensively safeguards battery safety, adding reassurance and elegance to every journey.
